

Project Design Phase

Problem – Solution Fit Template

Date	02 NOVEMBER 2025
Team ID	NM2025TMID02965
Project Name	Educational Organisation Using ServiceNow
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit refers to identifying a real challenge within educational institutions and designing a ServiceNow-based solution that effectively addresses it. It ensures that the platform meets the needs of students, faculty, and administrators while improving institutional efficiency and service quality. It helps educational leaders and system designers recognize what processes need automation and how the solution resolves their pain points.

Purpose:

- ☐ Streamline academic and administrative workflows through a unified ServiceNow platform.
- ☐ Reduce manual paperwork and delays by automating student and faculty service requests.
- ☐ Improve transparency and communication among departments using a centralized system.
- ☐ Increase user satisfaction by providing real-time updates, tracking, and faster resolution of issues.
- ☐ Understand existing educational challenges to deliver a more connected and efficient campus experience.

The project "Educational Organization using ServiceNow" focuses on transforming traditional academic and administrative operations into a unified digital system. By leveraging ServiceNow, the project automates key processes such as student admissions, academic progress tracking, and communication between faculty and administration. This ensures improved efficiency, transparency, and data accuracy across the institution. The solution minimizes manual errors, reduces processing time, and enhances user experience for students and staff alike. With structured workflows, real-time updates, and centralized management, this project lays the foundation for a smarter, more connected, and technology-driven educational environment.
